Subject Index

1s paraexciton 21

Ab initio calculation 386
Absorption 169, 230, 341
Absorption spectra 216, 461
Acidochromism 372
Activation spectroscopy 101
Aggregate 407
Alkali halides 230
Amorphous semiconductors 40
Amphi-PIC 429
Amplified spontaneous emission 321, 325
Anatase 88
Annealing 291
Artificial light harvesting 454
Axial dispersion 316

Band structure 34
Biexciton 34
Bipolaron clusters 271
Bistability 25
Blinking 353
Bosonic stimulation 11
Bosonization 200
Bound excitons 45

Cation-radical 386
Charge carriers 101
Charge generation 363
Charged exciton 127
Charged ferroelectric domain 271
Chlamydomonas reinhardtii 444
Coherence 1
Coherence length 136
Coherence time 136
Colloidal method 131
Columnar phases 407
Conjugated polymers 353, 368
Coulomb correlations 109
Coupled mode 142
Coupled quantum wells 216
Cyanine dye 416

Decay 242
Decay time 173
Defects 62, 196
Defects recombination 105
Degenerate four-wave mixing 465
Density matrix theory 461, 469
Density of states 308
Dephasing 407
Desorption 101
Dielectric tensor 316
Difference absorption spectrum 391
Diffusive transport 136
Diluted magnetic semiconductor 204
Dipole-forbidden energy transfer 117
Directional dispersion 312
Disorder 136, 208, 424
Disordered system 146
Distance distribution 434
Donor-bound excitons 30
Double-pulse excitation 142
Drift mobility 263
Dynamical mean-field theory 220
Dynamics 246

Effective Lande factor 127
Effective mass 40
Electroabsorption 291
Electron irradiation 75
Electron-vibrational interaction 458
Electronic excitations 97
Electronic relaxation 101
Electron–hole systems 200, 220
Emission 230
Energy transfer 377, 449, 454
Exchange splitting 127
Excitation propagation 329
Excited-state decay 458
Exciton 7, 11, 66, 71, 166, 169, 196, 395, 407, 424
Exciton bandwidth 308
Exciton dissociation 357, 363
Exciton ionization 105
Exciton Mott transition 200, 220
Exciton transfer 469
Exciton transport 411
Exciton-induced defects 101
Excitonic superfluidity 212
Exciton–phonon coupling 177

doi:10.1016/S0022-2313(05)00054-2

Exciton–phonon interaction 80, 287
Exciton–polariton 34
Excitons 25, 62, 122, 136, 225, 242, 333, 337, 465
Exoelectron emission 105
Extrinsic self-trapping 84

Femtosecond optics 225
Femtosecond pulse laser 275
Fluorescence 372, 377, 420, 469
Fluorescence decay 434, 439
Fluorescence resonance energy transfer 439
Four-wave mixing 7, 34
Frenkel excitons 295, 411
Frenkel pairs 97
Förster mechanism 449
Förster transfer 454
FTIR spectroscopy 381
Fullerenes 291

Giant oscillator strength 1
Glass film 169
Glass-ceramics 161
Glasses 92

Heterocycles 372
High resolution 25
Hole burning 345
Hot luminescence 166
Hot-wall epitaxy 321
Hydrogen-bonded ferroelectrics 250

II–VI semiconductors 173
Infinite-dimensions 220
Injection 337
Injections 333
Insulator to metal 275
Intercalation 45
Interface 71
Intermolecular interactions 474
Internal conversion 391
Intra-band transitions 17
Intraexcitonic terahertz transition 21
Intramolecular energy transfer 434
Ionic conductor 71
IR 283
Ir transmission 17
Isotope effect 259

Lasing from biexcitons 113
Lattice relaxation 255
Lattice structure 291
Layered structure 58
Light-harvesting systems 461
Localized state 146
LOV domains 444
Luminescence 50, 88, 131, 156, 181, 225, 242, 255, 341, 402
Luminescence properties 287
Luminescence spectra 439

Magnetic field 25, 109, 208
Magnetic field spin effect 368
MCM-41:Si–OH groups 381
Mechanism of dissociation of polaron pairs 368
Metalorganic chemical vapor deposition (MOCVD) 186
Molecular crystals 303
Mott insulator 283

Neutral-ionic transition 279
Nonlinear response 465

One dimension 200
One-dimensional system 255
Optical absorption 75
Optical manipulation 151
Optical near field 117
Optical properties 92, 181, 208, 312
Optical spectra 316
Organic electro-luminescence 341
Organic molecular beam deposition 312
Organic molecular crystals 299
Organic/inorganic semiconductor 54
Oxygen defect 71

P emission 191
Para-excitons 17
Phase control 345
Phase transition 246
Phosphorescence 377
Photo-induced defects 267
Photo-induced effect 259
Photo-induced phase transition 235, 275
Photocarrier 88
Photochromism 386
Photoenhanced current 333
Photoetching 131
Photoinduced magnetic phase transition 283
Photoinduced phase transition 279
Photoluminescence 40, 45, 62, 71, 84, 92, 122, 146, 161, 169, 191, 303, 381, 395, 449
PL 173
Polariton 7
Polaritons 225
Polaron 263, 386
Polaron pairs 368
Polarons 357
Pulse shaping 345
Pump–probe spectroscopy 391
Pump–probe technique 80

Quantum beat 66, 142
Quantum chemical methods 303
Quantum coherence 117

Quantum dot 131
Quantum dots 127
Quantum dots laser 113
Quantum Hall effect 212
Quantum paraelectric state 267
Quantum paraelectrics 242
Quantum well 204, 208
Quantum wells 54, 225
Quantum-size effect 166
Quasi-ballistic transport 136

Radiation effects 101
Radiation force 151
Radiative lifetime 1
Radiative recombination 40
Radical 283
Radioluminescence 75
Random lasing 321
Relaxation 166
Relaxation process 50
Resonance 151
Rotational disorder 295
Rydberg states 97

Scattering 407
Scintillation 156
Second-harmonic generation 295
Second-harmonic generation (SHG) 186
Self-assembly 321
Self-trapped exciton 50, 84, 88, 156
Self-trapped excitons 303, 420
Self-trapping 97, 242, 424
Short-range interaction 449
Singlet–singlet annihilation 321
Site-selective 424
Solvatochromism 372
Spectrally narrowed emissions 325
Spectro-temporal holography 345
Spin ladder 246
Spin–orbit interaction 66
Spiral 465
Sputtering 191
Static disorder 411
Stretched exponential decay 146
Strongly correlated electron system 255
Sub-monolayer nanostructure 177
Substituent effect 341
Superfluorescence 325
Superradiance 402
Surface states 196
SVD (singular value decomposition) 391

Thermo-modulation spectroscopy 308
Time-dependent Schrödinger equation 279
Time-resolved fluorescence spectroscopy 454
Time-resolved luminescence 30, 299, 416
Time-resolved measurement 161
Time-resolved photoluminescence 173, 250
Time-resolved spectroscopy 424
Transient photoconductivity 363
Transient photocurent 263
Trapping centers 287
Two-band Hubbard model 220
Two-photon absorption 113
Two-photon excitation 58, 250
Two-photon spectroscopy 11

Ultrafast 391
Ultrafast spectroscopy 299

X-ray time-resolved study 235

ZnO 7

Materials Index

2-bis(4-biphenylyl)thiophene crystal 325

Aggregates 329, 395
Anatase 50
Artificial molecules 122

Benzodithiophene 341
Biexciton 54, 127, 204

C_{60} 295
$CaF_2:Eu^{2+}$ 161
Carbon nanotubes 287
Carotenoids 391
CdSe 177
Chalcogenides 92
Charge-transfer complexes 235
Coherent phonon 80, 142
Conjugated polymer 377
Coronene crystal 308
Csi:Na 156
Cu_2O 11, 17, 21
CuCl 113, 117
CuI thin film 80
Cuprous oxide 25

Direct and indirect excitons 216

Erbium 92
Excitons 21, 40, 54, 127, 151, 204, 208, 267

Flavin mononucleotide (FMN) 444

GaAs/AlAs multiple quantum wells 142
GaInNAs/GaAs quantum well 146
Gallium nitride 30

J-aggregates 416, 424, 429
J-band 416

$KTaO_3$ 242

Layered compounds 45
LH2 420
Light-harvesting dendrimer 449

Mesoscopic ZnO particles 196
$Mg_xZn_{1-x}O/Mg_yZn_{1-y}O$ multilayers 186
Molecular aggregates 411
Molecular excitons 402
Molecular material 474
Molecular nanoaggregates 420

Nanocrystals 161, 169, 368
Nanofibers 321
Nanoparticles 156, 166
Nanophotonics 117
Naphthalocyanine 345
Ns^2 ions 230

Oligothiophenes 312, 316, 402
Optical spectroscopy of molecular aggregates 474
Oxychalcogenide 66

Pb^{2+} 230
$PbHPO_4$ 250
Pentacene film 337
Perovskite oxide 259
Perovskite-type oxide ceramics 75
Photonic crystal 329
Phototropin 444
Polaron 395
Poly(di-n-hexylsilane) (PDHS) 381
Poly(para-phenylenevinylene) 357
Polysilane 386
Porphyrin 454
PTCDA 299

Quantum dots 109, 122, 151

Rare-gas solids 97

Self-trapped exciton 58, 250
Single J-aggregate spectroscopy 429
Single molecule 353
Soft-anharmonic phonon 271
Spin-crossover complexes 235
$SrTiO_3$ 263, 271
Strontium titanate 259
Superlattices 212

Tetracene 333
Thin films 181, 191, 312, 465
TiO_2 88
Titanium dioxide 50
TlB 84
TlI 84
Tomonaga–Luttinger liquid 200
TTF-CA 279
TTTA 283

Zinc oxide 173
ZnO 34, 169, 173, 191
ZnO film 186
ZnSe 177
ZnS–CdS alloy 131

doi:10.1016/S0022-2313(05)00056-6
